32 WATT, 70 VOLT DIRECT BURIAL TRANSFORMER

PART #: 32HT70-WP

Model 32HT70-WP is a 32 watt transformer for use in constant voltage sound reinforcement systems, and uses direct burial cable to connect to underground systems. This unit has an insertion loss that does not exceed 1 dB with a frequency response of +/- 1dB from 50 - 15KHz. The primary taps are 16, 8 and 4 watts. The secondary impedance is 8 ohms. See detailed specifications below.

- 32 Watt
- 70.7 Volt
- 4 & 8 Ohm Secondary Impedances
- 32, 16, 8 Primary Taps
- +/- 1 dB from 50 - 15KHz Frequency Response

Primary Specifications

- **32 Watt**
- **70.7 Volt**
- **4 & 8 Ohm Secondary Impedances**
- **32, 16, 8 Primary Taps**
- **+/- 1 dB from 50 - 15KHz Frequency Response**
